Co-chair of a Technical Session about Safety Management & Safety Culture for the 30th Annual Canadian Nuclear Society (CNS) Conference

The Canadian Nuclear Society (CNS) is dedicated to the exchange of information concerning the application of nuclear science and technology. This includes all aspects of nuclear energy and other nuclear technologies such as environmental protection, medical applications, the use of radioisotopes and food preservation.

Services:

ISR had the privilege of being able to co-chair the technical session for Safety Management and Safety Culture at the 30th annual CNS conference, entitled *New Nuclear Frontiers*, held in Calgary, Alberta Canada. Contributors to the session included representatives from all of Canada's nuclear power plants, high ranking civil aviation officials and international nuclear safety professionals. The paper, co-written by ISR, in support of the technical session: [***Institutional Failure: Are Safety Management Systems the Answer?***](#), has been translated in to [***Chinese***](#) by our nuclear industry colleagues from the People's Republic of China.
