

SMS Development and Training in support of Transport Canada's Phase #3 exemption submission for Trans Capital Air

Trans Capital Air is a Canadian company based in Toronto Ontario that offers leisure and corporate charters. Trans Capital Air has planes based in Kathmandu, Nepal, Port au Prince, Haiti, Abidjan and the Ivory Coast that are flown on contract for the United Nations. The remaining planes are based in Toronto.

Services:

To provide Trans Capital Air with an enhanced understanding of the Transport Canada SMS requirements, ISR delivered introductory indoctrination and specialized training for selected Trans Capital Air staff. Participants obtained a set of tools and activities to help with the development, implementation and assessment of SMS.

ISR was then rehired by Trans Capital Air to assist in the preparation for the submission to Transport Canada (TC) to satisfy the requirements for Phase #3 of the transition to compliance with TC SMS regulations.

To complete this task, ISR delivered specialized training on the subject of proactive hazard identification. ISR then developed amendment materials to be incorporated into the Trans Capital Air SMS manual.
