Training in support of Transport Canada's Phase #1 SMS Implementation for Small Airports provided to the Quebec Airport Council members (CAQ)

The Quebec Airport Council (QAC) is a group composed of airport professionals from across the province of Quebec in Canada. The objectives of the QAC are to encourage the exchange of information between airports in Quebec, share experience and expertise, represent the interests of Quebec airports, and the establish partnerships with the International Civil Aviation Organization,

Services:

ISR, in association with Jacques Whitford, developed and delivered a two-day introductory SMS training course.

The course focused on the Transport Canada SMS model and regulations applicable to the QAC. Specifically on those applicable to the requirements of the SMS Phase#1 Airports exemption submission.

During this course, QAC members also had the opportunity to participate in a series of practical workshops to further their understanding of SMS components and elements. Some of the practical workshops included:

- Hazard Identification and Risk Assessment Exercises
- Performance Measurement
- Reporting
- How to develop an SMS Manual
