Development of the Operational Environment, Health and Safety Management System Manual for Task Force commanders for the Department of National Defence – Canadian forces (DND/CF)

In Canada, the operational commands of the DND/CF are broken into four major groups:

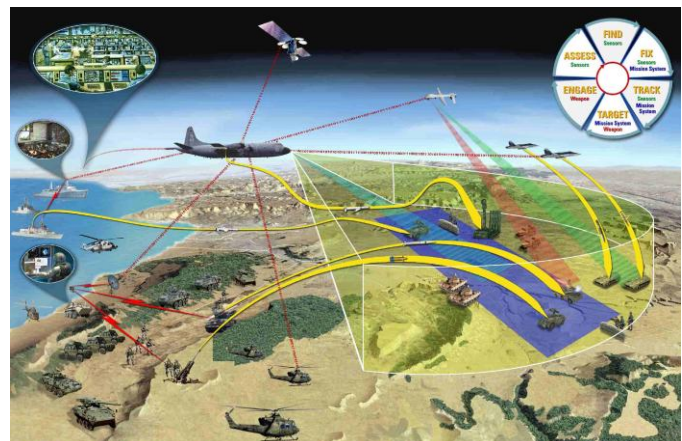

- CANADA COMMAND, for operations in Canada and North America;
- Canadian Special Operations Forces Command (CANSOFCOM), which provides agile, high-readiness Special Operations Forces;
- Canadian Operational Support Command (CANOSCOM), which delivers national-level operational support to CF missions at home and abroad; and
- Canadian Expeditionary Force Command (CEFCOM), which plans and conducts all CF operations outside of North America (except those conducted by CANSOFCOM).

Services:

At the request of the DND/CF, ISR performed a review of the Operational Command's safety programs.

The review and gap analysis were performed via a comprehensive literature research review.

Based on this research, ISR developed a DND/CF Operational Environment, Health and Safety Management System manual for task force commanders (named OPSAFE) as part of an Integrated Management System.
